

MSC-712

OPERATIONAL MANUAL

BASIC OPERATION INSTRUCTIONS

Please read this operational manual thoroughly before using the chair.

- When first turning on the power, the massage mechanism in the chair back will automatically return to its original position. The bill acceptor is now ready to accept bills of any denomination.
- After accepting bills, the digital display on the right armrest will indicate the total minutes for which the massage chair will operate. When the massage begins, the digital display meter will start counting down.
- When the massage is in process, adding more bills will increase the minutes for which the massage will provide. The digital display will display the total minutes, and start counting down again.
- When time is up, the massage actions stop and the massage mechanism return to its original position. During the returning process the bill acceptor stops accepting bills temporarily until the mechanism reaches the original position.

We wish you a prosperous business.
